

Conference Program

Tuesday, May 7

8:00 AM - 9:00 AM

Registration and Breakfast

9:00 AM - 9:30 AM

CONFERENCE WELCOME

Bernadette Conant, CEO, Canadian Water Network

9:30 AM - 10:15 AM

OPENING KEYNOTE

Jay Famiglietti, Executive Director, Global Institute for Water Security

10:15 AM - 10:45 AM

Refreshment break

10:45 AM - 12:00 PM

PLENARY FISHBOWL

Blue Cities is a conference for decision makers, and everyone in the room holds deep expertise. This year we are introducing a fishbowl format to draw upon this knowledge and advance a national conversation. The moderator will introduce the overall topic with a number of scenario questions and guest experts will begin the discussion. At any point, a member of the audience can move into an empty chair to join the fishbowl. As the discussion continues, multiple participants will enter and leave the fishbowl. Once the time runs out, the fishbowl is closed and the moderator summarizes the discussion.

Fishbowl Topic #1: Climate Change and Water Management

Discussion will focus on risk and vulnerability, flooding, source water concerns, emergency management and stakeholder roles.

Fishbowl Topic #2: Paving the Way for Innovation

Discussion will focus on the drivers and barriers to innovation, success stories and increasing collaboration among sectors.

Moderator: Carl Yates, General Manager, Halifax Water

Albert Cho, Vice President and General Manager, Advanced Infrastructure Analytics, Xylem

Michael D'Andrea, Chief Engineer & Executive Director, Engineering and Construction Services, City of Toronto

Erin Mahoney, Commissioner of Environmental Services, York Region

Canadian Water Network
BLUE CITIES 2019
Conference Program

12:00 AM - 1:30 PM

Lunch

1:30 PM - 3:00 PM
CONCURRENT SESSIONS

1A - Bridging the Public/Private/Commercial Divide

The complex challenges that utilities face may require solutions that extend beyond the scope of their responsibility. Every challenge has multiple stakeholders – whether it's residential or commercial customers, small businesses, NGOs or industry – and each can play a critical role in implementing solutions. Participate in our fast-paced “fishbowl” session and highlight strategies that have bridged the public/private/commercial divide to advance and accelerate progress.

Rob Renner, CEO, The Water Research Foundation

1B - Making the Case for Resource Recovery in Canada

Join a lively debate on the potential for resource recovery in Canada, both now and in the years ahead. What are feasible opportunities, drivers and barriers for adoption? Are there small gains to be made, or does the potential exist for bigger impacts? Let's talk about onsite and offsite resource recovery options (such as biosolids, energy, reuse and nutrient recovery) and how the costs/benefits of their application are being weighed by municipalities across Canada.

Moderator: Erin Mahoney, Commissioner of Environmental Services, York Region
Dean Shiskowski, Vice President, Water Resource Recovery, Associated Engineering

3:00 PM - 3:30 PM

Refreshment break

Conference Program

3:30 PM - 5:00 PM
CONCURRENT SESSIONS

2A – Affordability, Equity and Financial Sustainability

Climate change, urbanization and infrastructure challenges will demand substantial future investment. As user rates rise to address these issues, utilities may unintentionally burden low-income households. Finding novel approaches to utility finance is critical to addressing issues of affordability and equity, and also ensuring long-term sustainability. Join our dynamic “fishbowl” discussion, where we’ll explore financial solutions that are being implemented and considered by municipal utilities.

Fishbowl Topic #1: Financial instruments to support sustainability

Fishbowl Topic #2: Addressing customer equity and affordability

Andrew Burham, Vice President and Global Practice Leader of Financial Services, Stantec
Stephen Lidington, Director, PwC Canada
Sarah E Thomson, Vice President, Sustainable Finance, RBC Capital Markets

2B – Municipal Water and Wastewater Systems in a Low Carbon Economy

As global trends shift toward a low-carbon future, energy and GHG reduction drivers will become increasingly prominent in utility decision-making. Water and wastewater systems may be harnessed to meet a growing demand for local, renewable energy. Utilities may also look to implement novel strategies to achieve reduction. Leading utilities and researchers in this space will discuss how GHG regulations and carbon pricing will impact decision-making over the next 10 years and the opportunities that are emerging.

Indra Maharjan, Program Manager, Energy Conservation, Resource Recovery and Climate Change, Ontario Clean Water Agency

5:00 PM - 6:00 PM

Conference break

6:00 PM - 8:30 PM

WELCOME RECEPTION & POSTER SHOWCASE

Sponsored by COLE Engineering

8:30 PM - 11:00 PM

BLUE NETWORKING

Co-hosted with Toronto Blue Drinks

Open to the water community - conference attendance not required.

Conference Program

Wednesday, May 8

7:30 AM - 8:30 AM

Breakfast

8:30 AM - 9:00 AM

DAY 2 WELCOME

9:00 AM - 9:30 AM

CONFERENCE REMARKS

9:30 AM - 10:45 AM
CONCURRENT SESSIONS

3A - Getting More from Asset Management Data

Asset management holds great potential to support utilities in adapting their systems to future risks. Improving outcomes through asset management does not require the collection of more data, but rather, better (or more creative) use of data. This session will dive into what better and creative could look like, with case studies that illustrate how these approaches could lead to a deeper understanding of your system and support more informed decisions.

Moderator: Andrew Farr, General Manager Water and Wastewater, Region of Peel
Gregory Baird, President, The Water Finance Research Foundation
Vanessa Chau, Head of Asset Management Canada, AMCL Ltd.
Daryush Emaili, Manager of Corporate Asset and Project Management, City of Guelph

3B - Monitoring Emerging Contaminants and their Impacts

The list of emerging contaminants in Canada's waterways continues to grow. However, despite our ability to detect these chemicals, in many cases, the potential impacts to environmental and human health are not yet known. Robust monitoring strategies are needed to better assess impacts. Learn more about evolving approaches to monitoring, as well as methodologies being used to assess risks at local and watershed levels.

Moderator: Suzanne van Drunick, National Program Director of Safe and Sustainable Water Resources Research Program, EPA
Matthew McCandless, Executive Director, International Institute for Sustainable Development - Experimental Lakes Area
Nancy Stalker, Manager of Water Quality Services. The City of Calgary

Conference Program

10:45 AM - 11:15 AM

Refreshment break

11:15 AM - 12:30 PM
CONCURRENT SESSIONS

4A - Safe-to-Fail: A Changing Paradigm for Resiliency

Historically, our industry has focused on designing to standards, but past averages are no longer suitable predictors of future events. Given the uncertainty posed by climate change, how do municipal utilities adequately plan for future risks? Is it time to shift our thinking, anticipating that failures will be inevitable? Let's examine this concept through the lens of day-to-day challenges, as well as higher-intensity events, and explore how this view may alter the way we plan and operate our systems.

Francois Bouchart, Manager, Infrastructure Planning, City of Calgary
Adam Lovell, Executive Director, Water Services Association of Australia

4B - Good Governance for Today's Utility Needs

Good decision-making is vital for long-term sustainability, yet current municipal and utility governance structures may limit or impede a utility's adoption of the best options or decisions. What elements can best support good business decisions? How can utility governance models be adapted to incorporate these elements? Join municipal and industry leaders to discuss governance models that can adapt to evolving realities and learn from participants who have implemented these approaches.

Moderator: Carl Yates, General Manager, Halifax Water
Rodney Bouchard, General Manager, Union Water Supply System
Lou Di Gironimo, General Manager, Toronto Water
Mariëlle van der Zouwen, Manager, Knowledge Management Group, KWR

12:30 PM - 1:45 PM

LUNCH & CLOSING KEYNOTE

1:45 PM - 2:00 PM

CLOSING REMARKS
