Data Driven Decisions

Asset Management data practices in Utilities

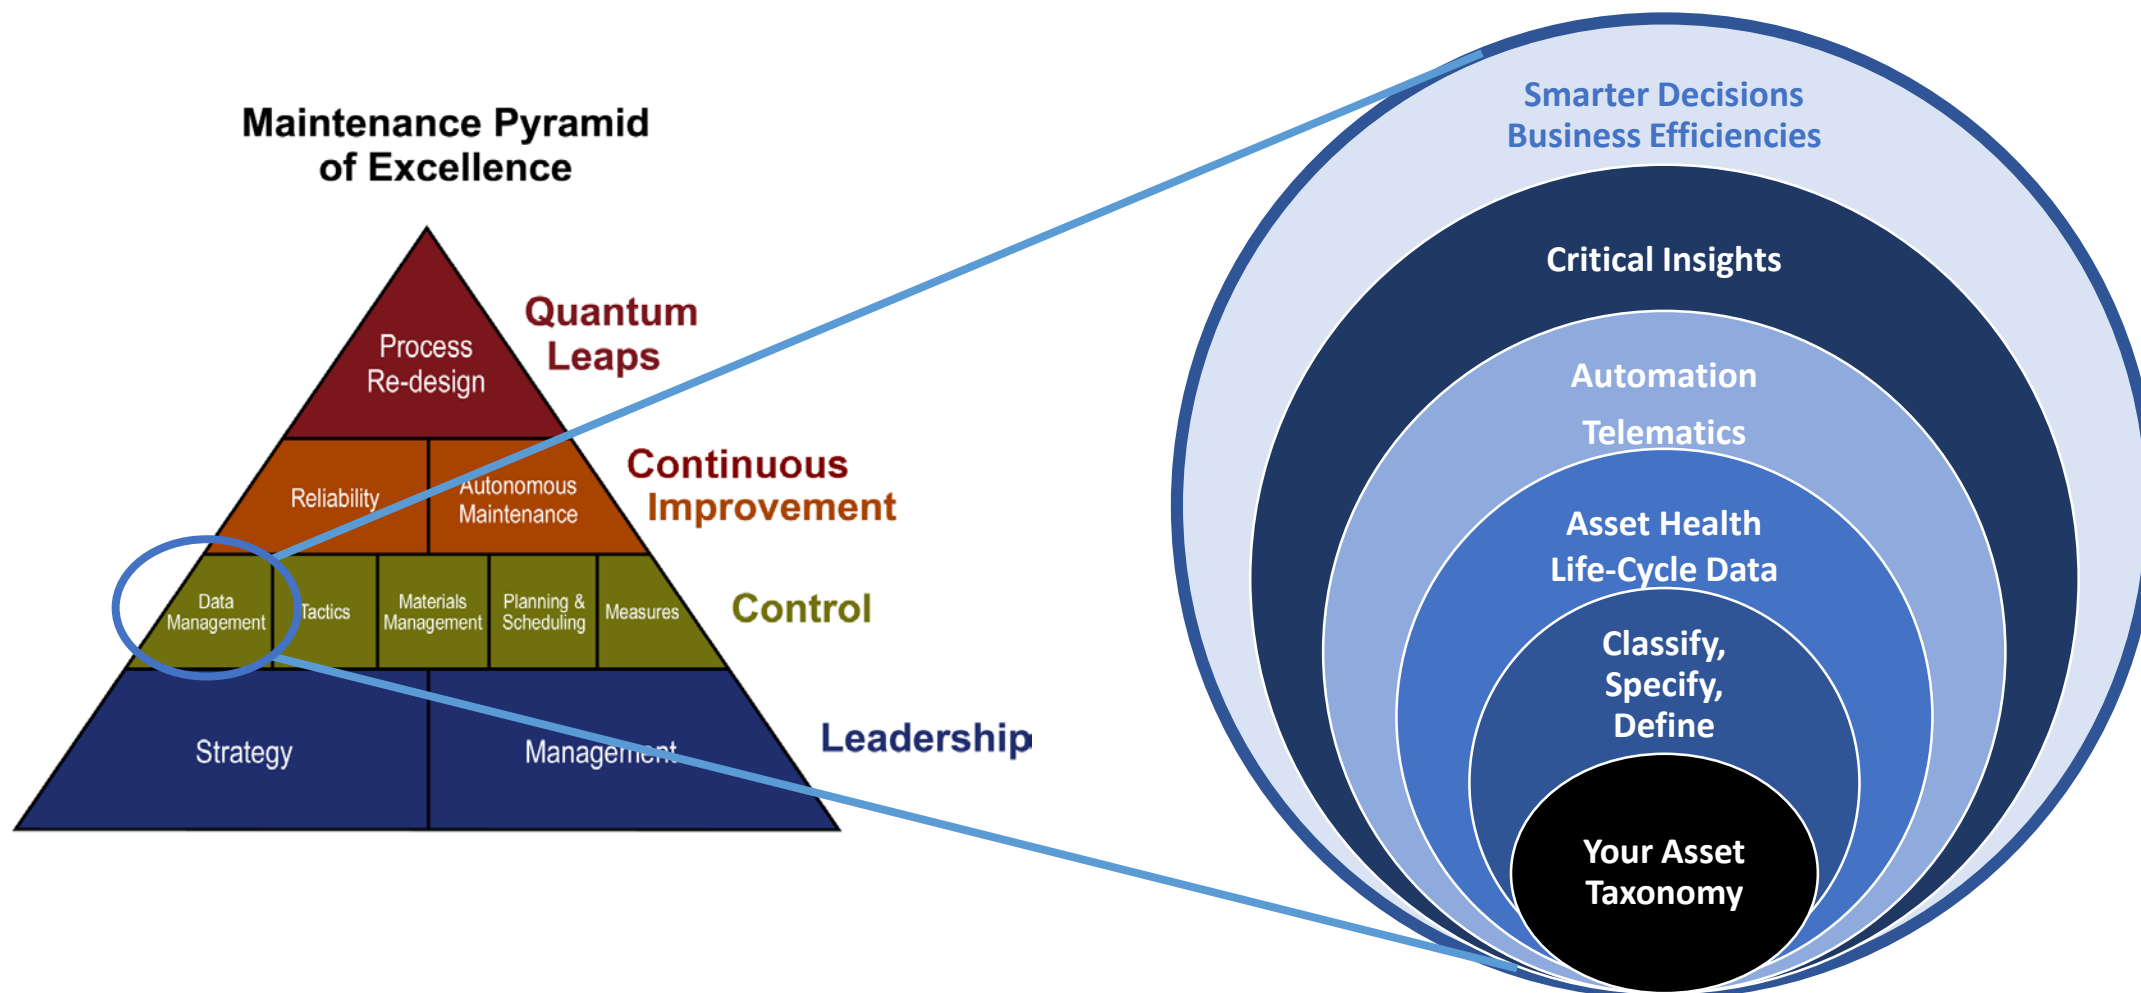

May 2017

Jason Speers (OCWA)
Atif Sheikh (IBM)

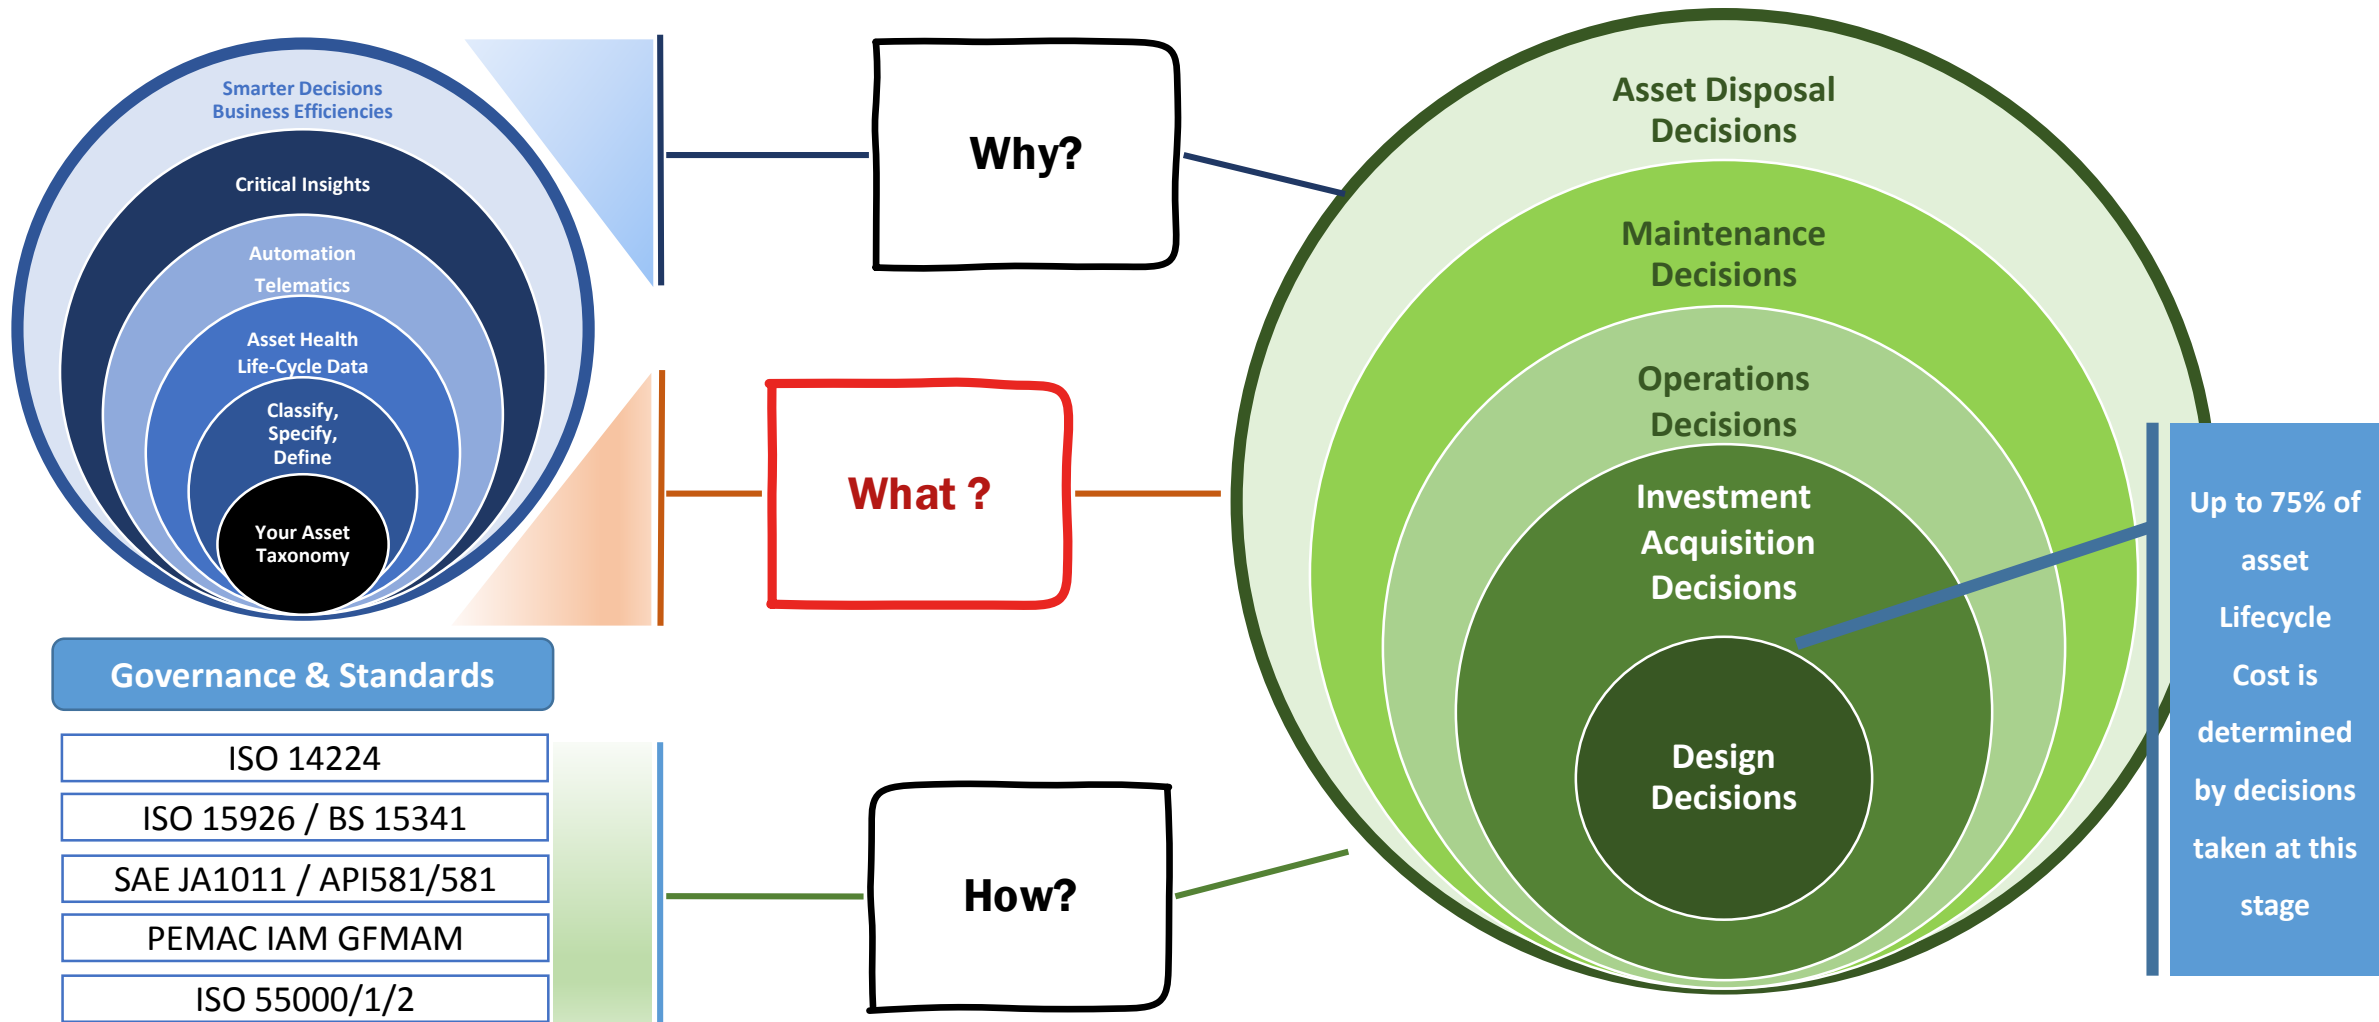

Data at the helm of asset management pyramid of excellence

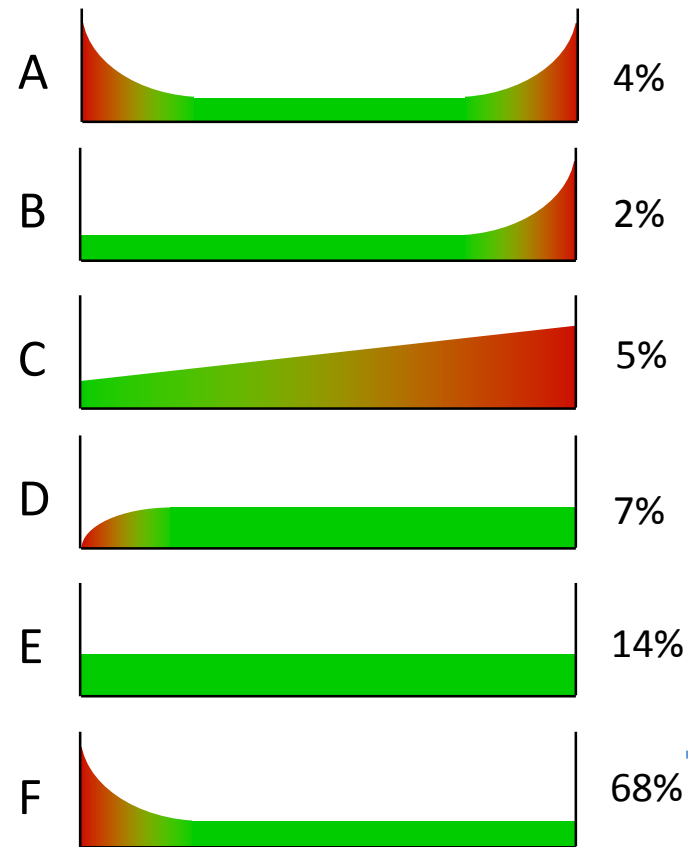

Big data – accelerators in Asset Life Cycle Decisions

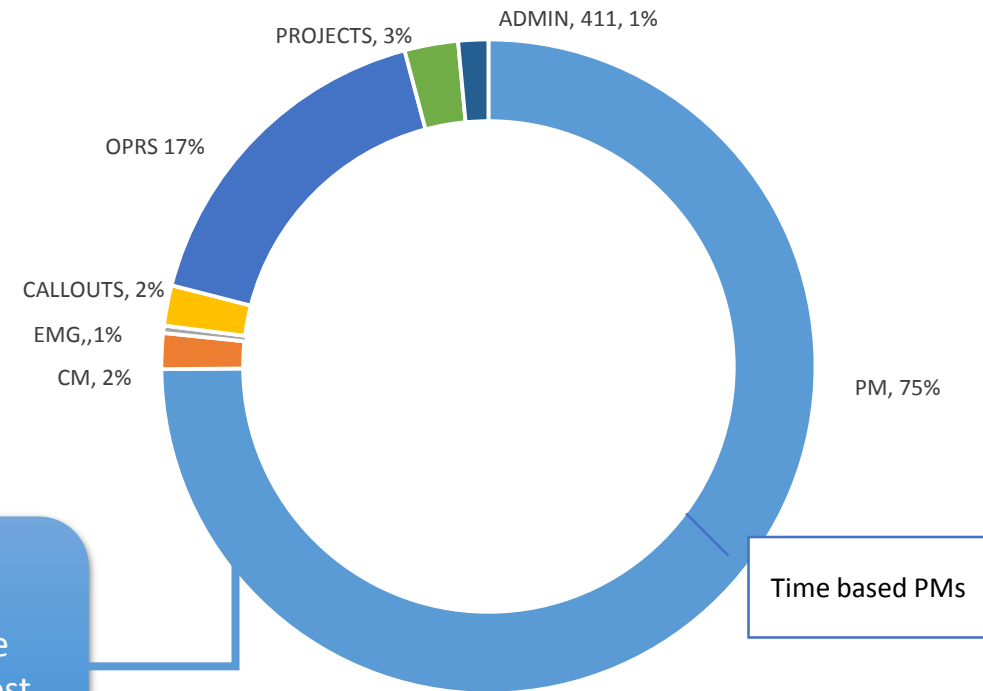

Problem: Defining an optimum maintenance regime?

Probably an incorrect maintenance regime for most dominant failure pattern

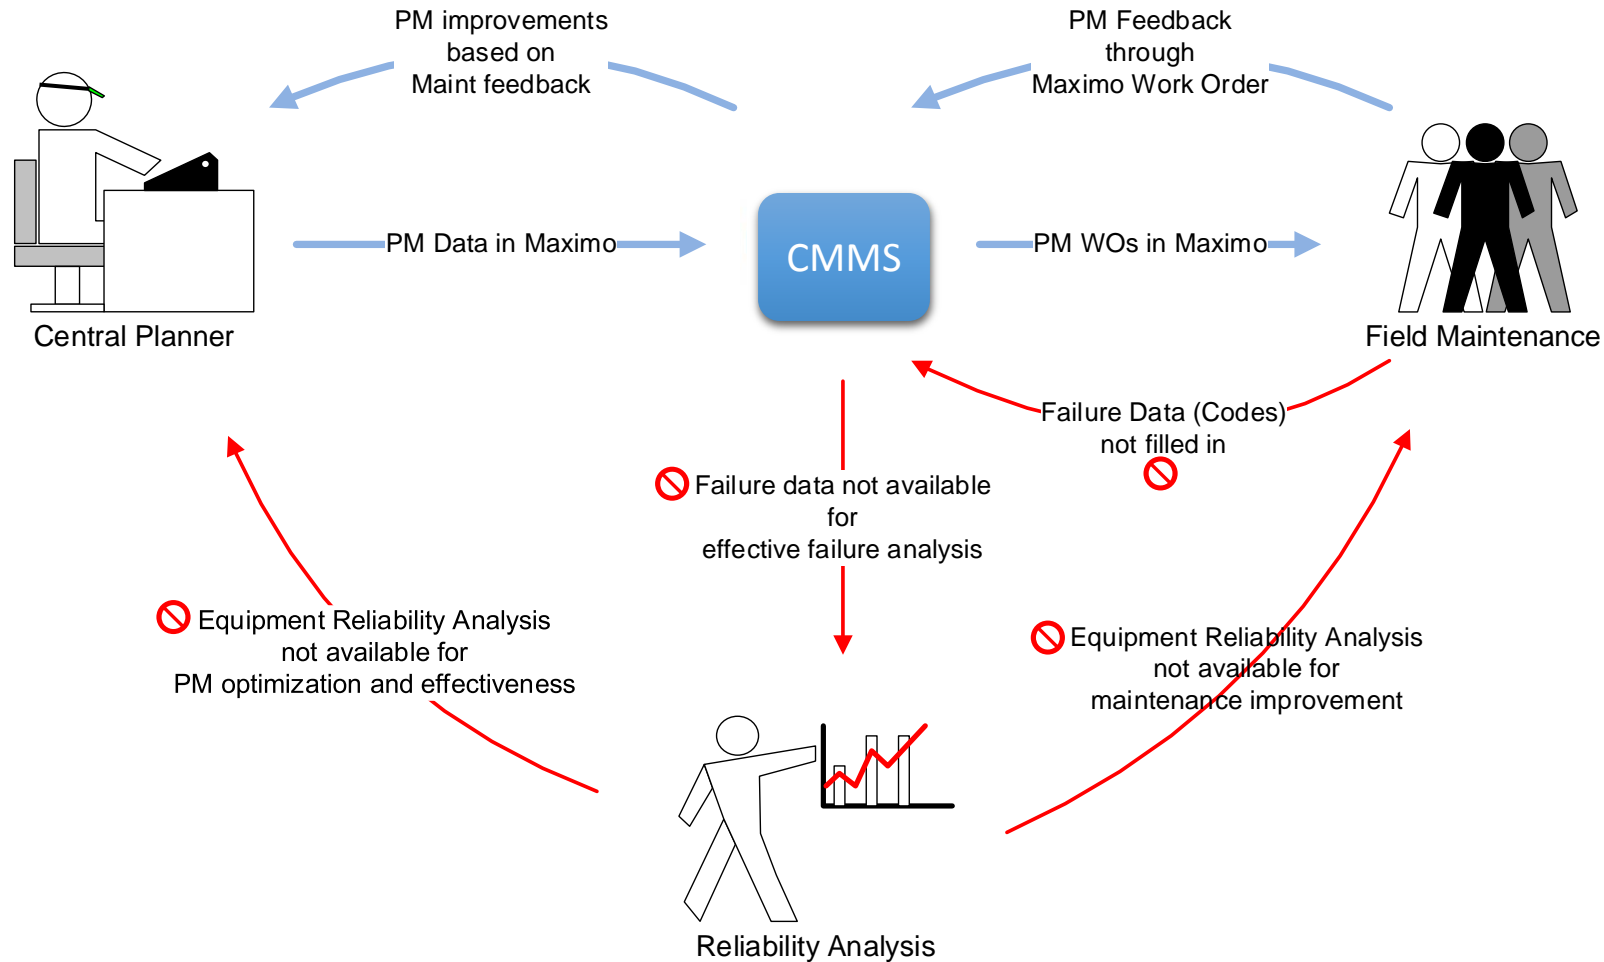

An RCM analysis will help validate this

Utilities Work Type Distribution
(Open WOs 1Q 2017)

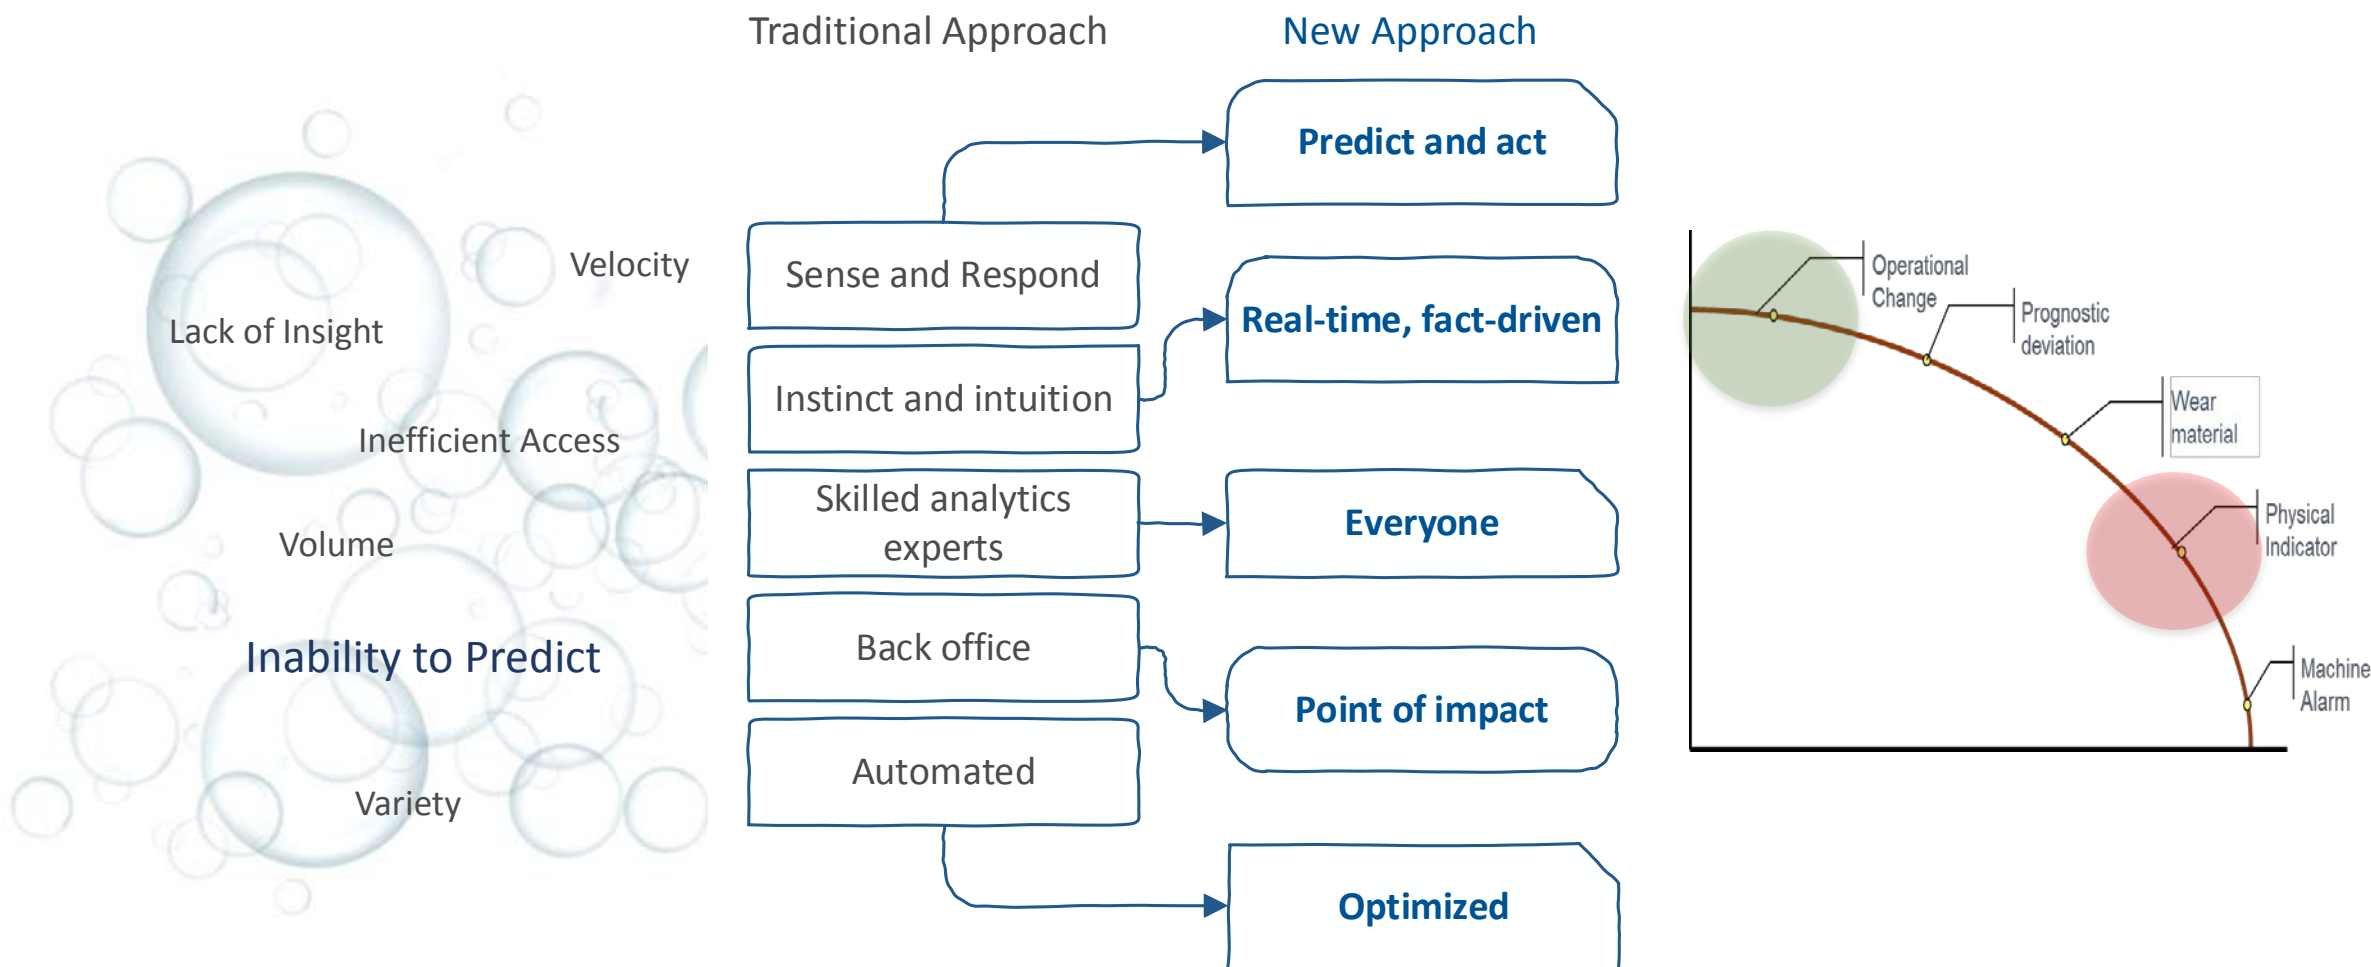

Problem: Asset Health feedback – Information Breakdown

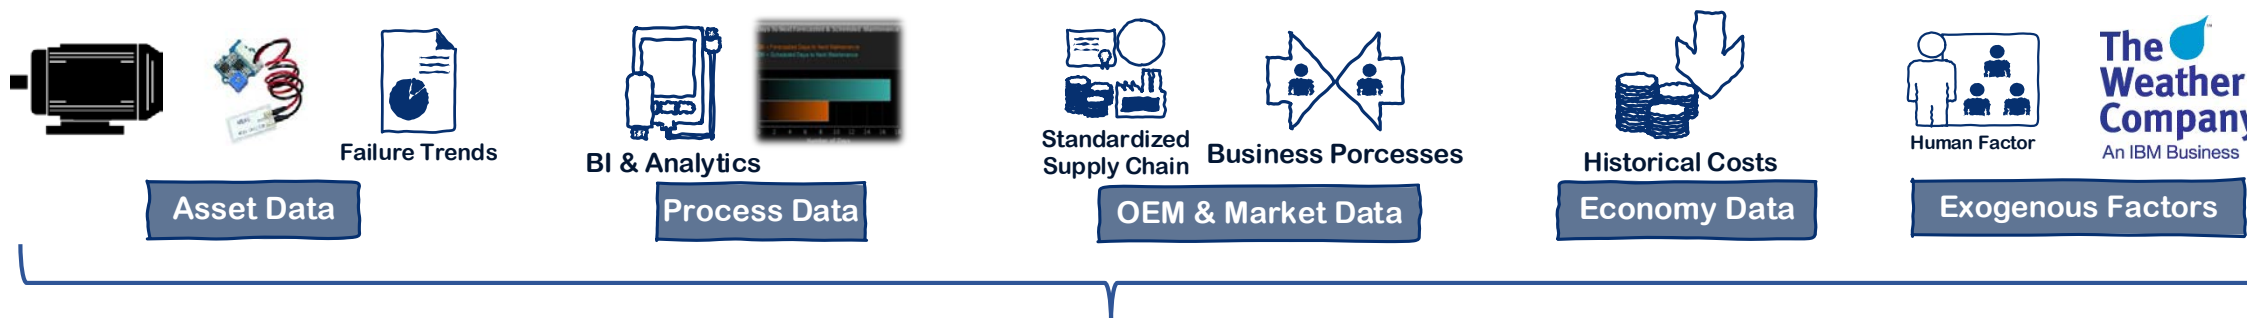

New challenges and conditions have placed a renewed urgency on predictive analytics

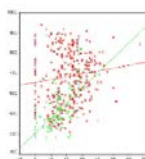

PMQ and Predictive Analytics – Leverage your RCM efforts

Connectivity

real-time, fact-based understanding
of asset performance and usage

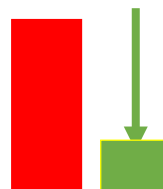

Analytics

RCA - based on known Failure
Modes, causal associations and
failure patterns

Monitoring
Reporting

reduced unplanned downtime
lower maintenance costs
fewer warranty claims
lower parts and inventory costs

extended asset life
improved product quality
improved production yield
optimized maintenance schedule

Next generation analytics – a transition towards cognitive asset care approach

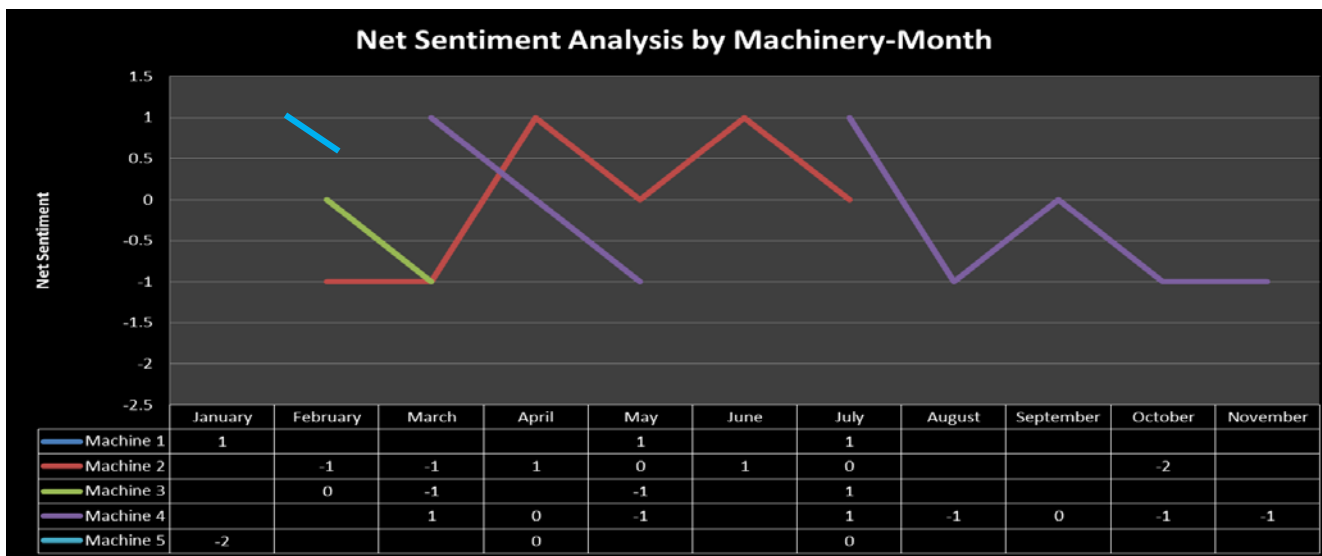

| Date | Shift | Remarks |
|----------|-------------|--|
| 01-07-13 | 10:00:00 PM | 'All is good in this machine' |
| 01-01-13 | 2:00:00 PM | 'No problem Found in this Machine' |
| 01-09-13 | 10:00:00 AM | 'Vibration is more than usual' |
| 01-07-13 | 10:00:00 AM | 'adjust clamps from hitting heads ' |
| 01-04-13 | 10:00:00 PM | 'Leak seems to have developed' |
| 01-03-13 | 10:00:00 AM | 'HYD LEAK ON CLAMPS, POSSIBLE BLOWN GUAGE' |
| 01-02-13 | 10:00:00 AM | ' Hyd. oil leak, B-Axis table.' |
| 01-11-13 | 6:00:00 PM | ' Hyd. oil leak, B-Axis table.' |
| 01-05-13 | 10:00:00 PM | ' Hyd. oil leak, B-Axis table.' |

Signals received by Log analysis **and** sensor data, leading to fixing vibration issue, but no further investigation of already created damage due to vibration

Recommendation not captured in automated work order generation; work not done.

Important inspection logs not captured in structured predictive maintenance. No signals raised.

Employ text analysis to *reveal* detailed insight that is absent in structured predictive maintenance data

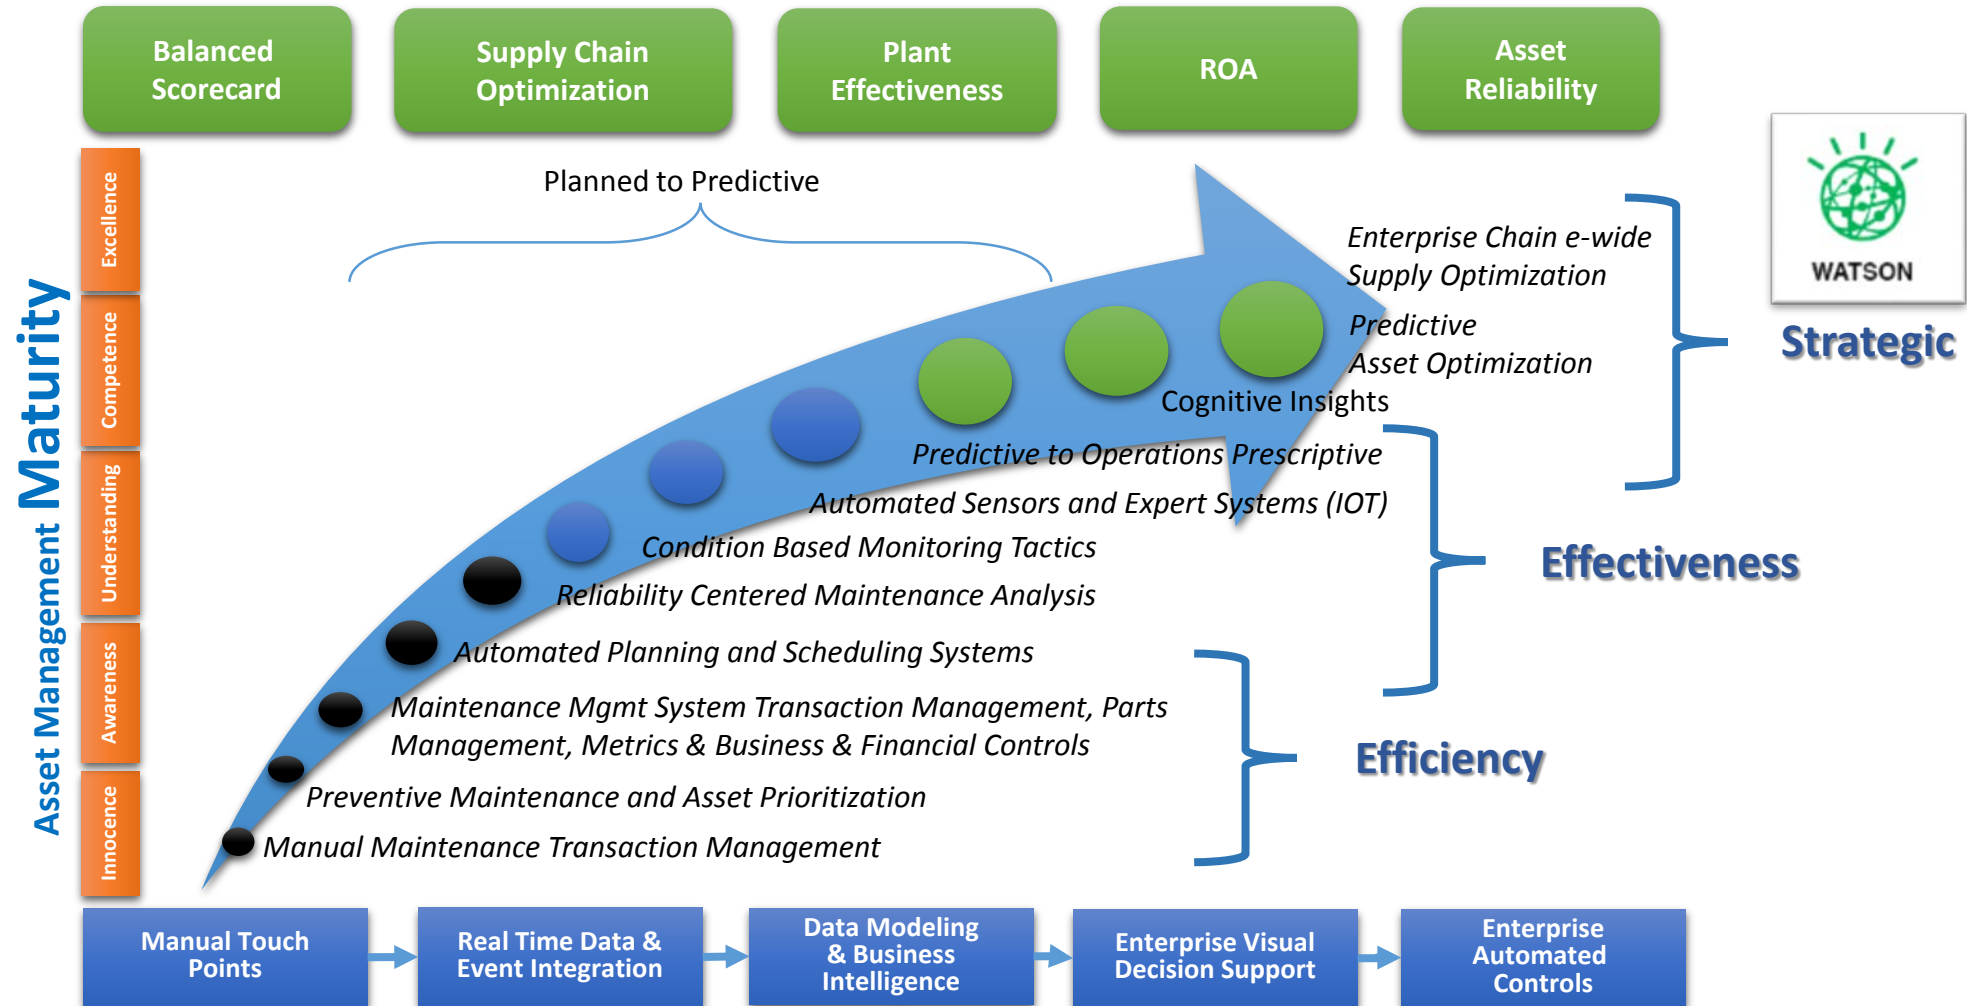

Text analytics indicates that machinery 2,3,4 & 5 have negative comments from inspection engineers.

This insight is NOT reflected in the sensor data.

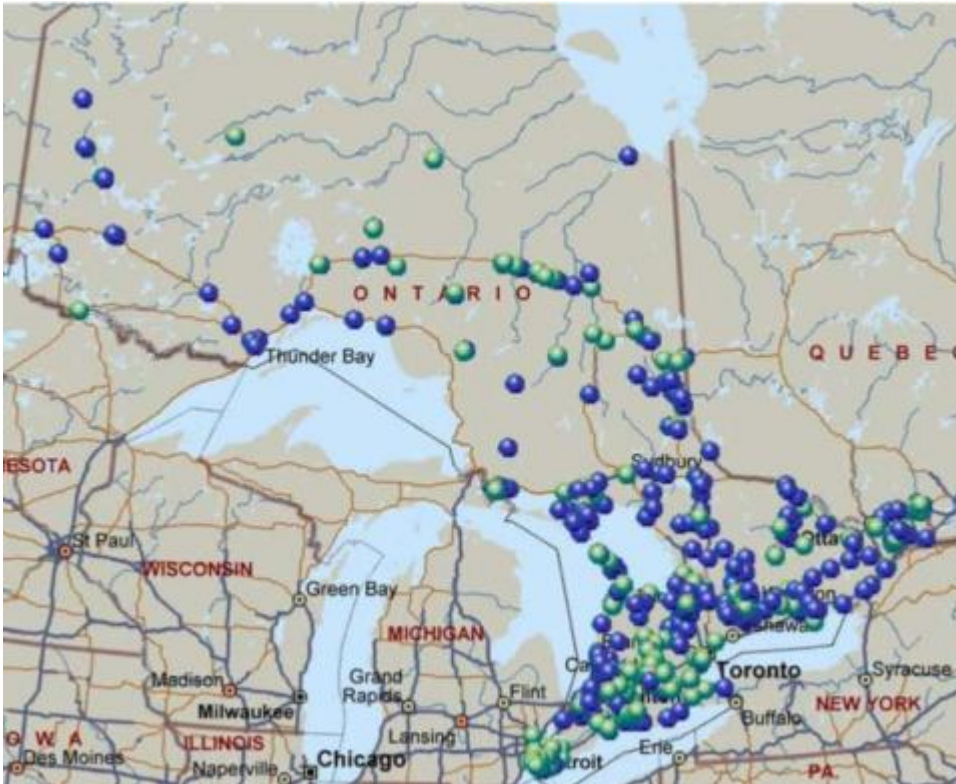

Art of Possible – An evolution of Asset Management through data analytics

IT Sophistication in Asset Management

Ontario Clean Water Agency (OCWA)

- Serve a population over 4M
- Total Solutions Provider including, Operations and Maintenance (O&M), PM, and Financing
- 180 Municipalities and First Nations
- 600 treatment facilities
- Provincial Crown corporation with 800 staff

“Data-Driven Decisions”

...Starts with the word “Data”

**Approx. 100K
assets

**1.3M data
points from
accredited labs
annually**

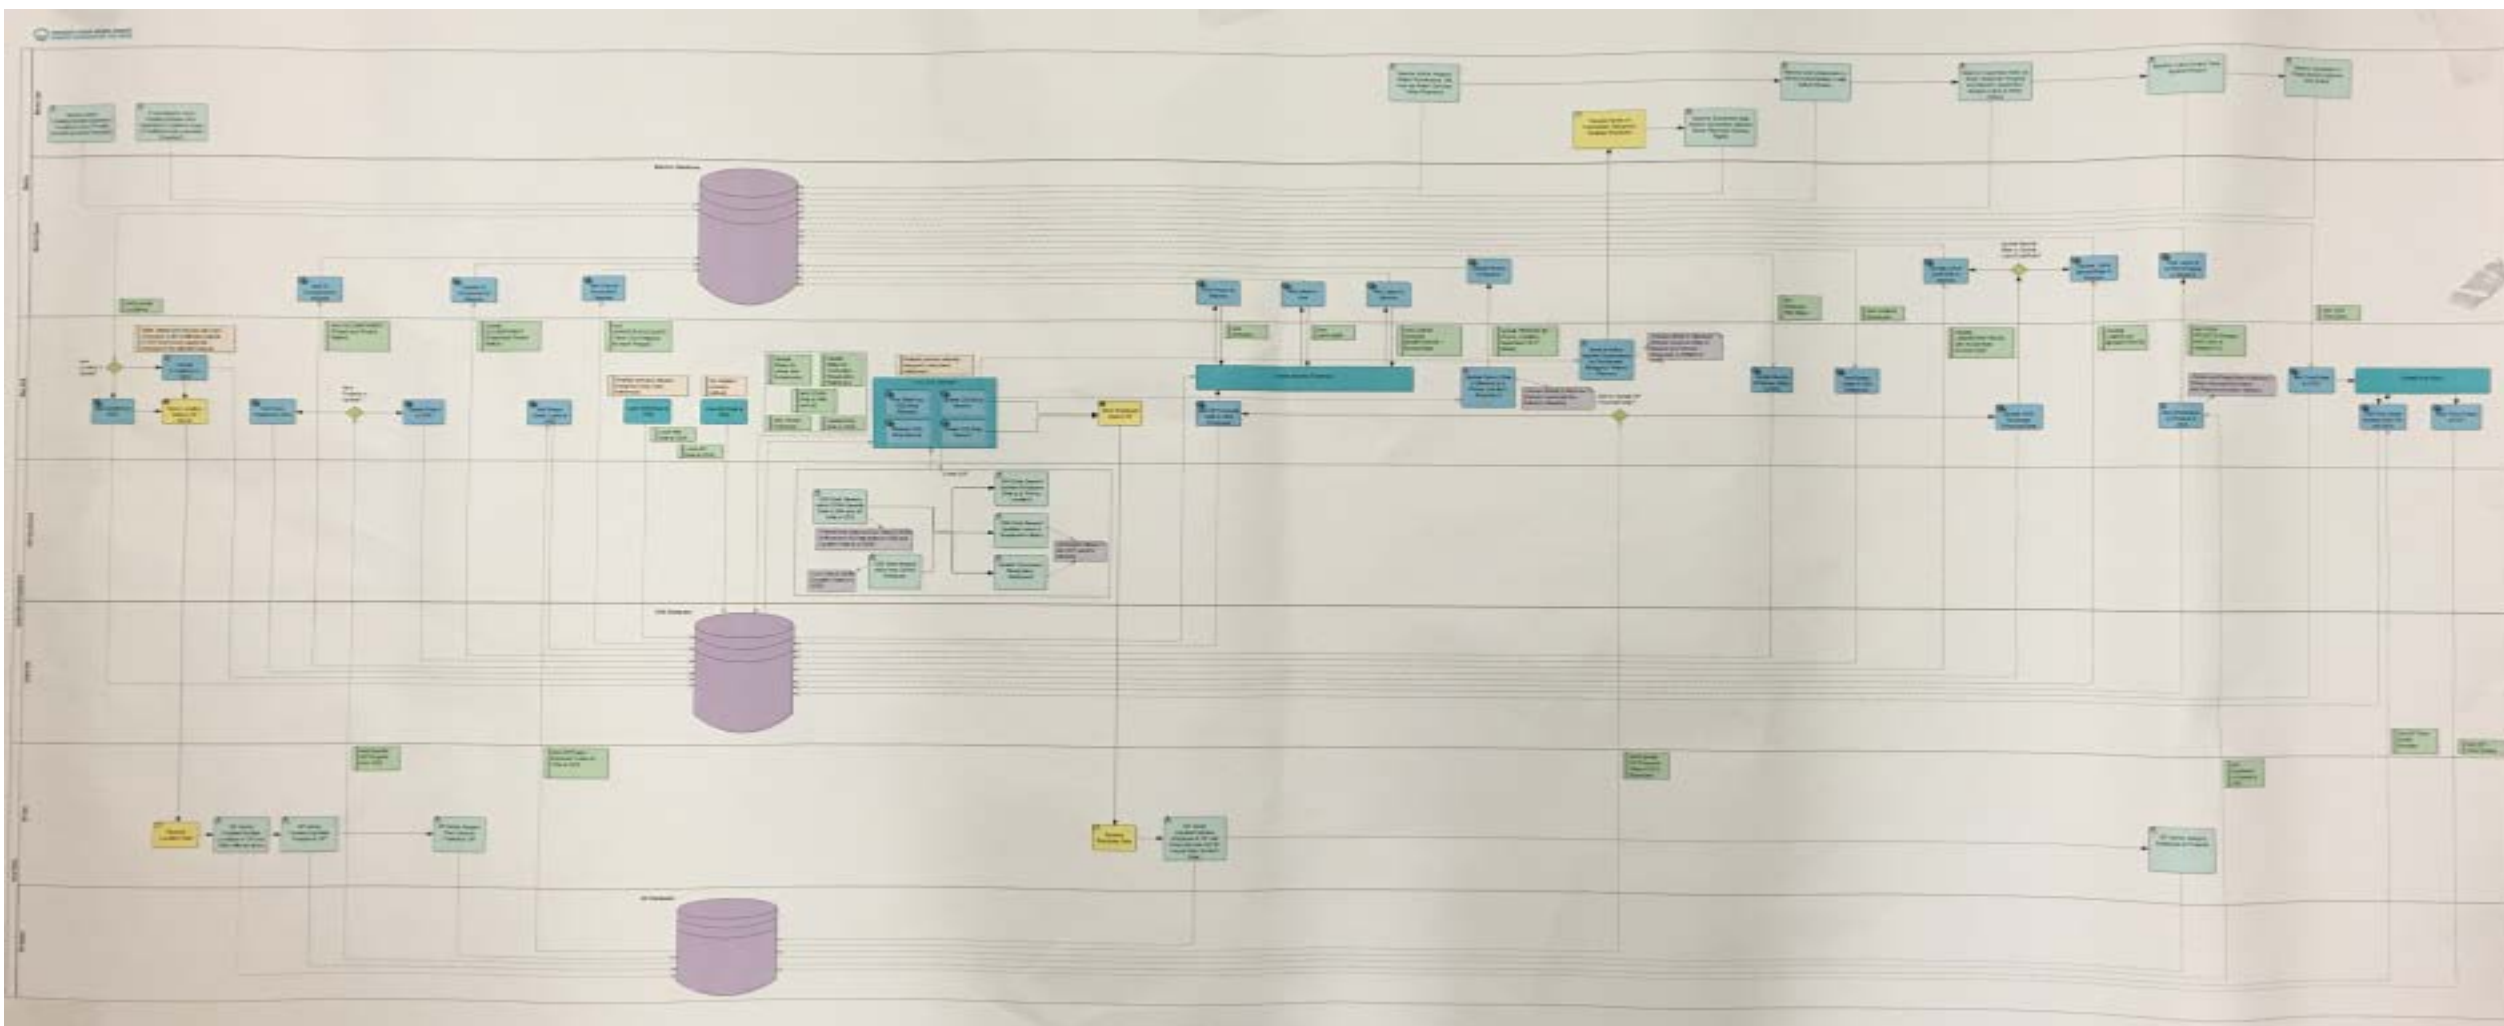

**3M data points
from operator
rounds annually**

**1.7M timesheet
transactions
annually in FIS**

Governance

- Information Governance
- Organizational Governance
 - What is the role of “IT” vs. what is *my* role in information management?

“The perceived value of IT and the role of the CIO are changing in the era of digital business. In the digital age, enterprises need a new approach to strategy, one that includes information and technology from the start.”

Gartner, 2017; Leading through Business, Innovation and IT
